O. Pompeiano, Pisa

Coordinating Editor

F. Kreuzer, Nijmegen

Springer International

Pflügers Archiv · European Journal of Physiology

Founded in 1868 as „Pflügers Archiv für die gesamte Physiologie des Menschen und der Tiere" by *E. F. W. Pflüger*. Edited by *M. Verworn, E. Abderhalden, A. Bethe, R. Höber, A. v. Muralt, H. Rein* et al.

Published: Vol. 1–29 (1876) Bonn, Cohen und Sohn; Vol. 30–92 (1901) Bonn, E. Strauß; Vol. 93–170 (1917) Bonn, M. Hager; since Vol. 171 (1918) Berlin, Springer.

Since 1920 Pflügers Archiv has included: „Archiv für Physiologie" (Archiv für Anatomie und Physiologie, Physiologische Abteilung). Founded and edited by Johannes Müller, E. du Bois-Reymond, W. v. Waldeyer-Hartz et al. 1877–1914. Leipzig, Veit und Co., since 1915, Berlin, Vereinigung Wissenschaftlicher Verleger, afterwards Walter de Gruyter.

The exclusive copyright for all languages and countries, including the right for photomechanical and any other reproductions, also in microform, is transferred to the publisher.

The use of registered names, trademarks, etc. in this publication does not imply, even in the absence of a specific statement, that such names are exempt from the relevant protective laws and regulations and therefore free for general use.

Authors of this journal can benefit from library and photocopy fees collected by VG WORT if certain conditions are met. If an author lives in the Federal Republic of Germany or in West Berlin it is recommended that he contacts Verwertungsgesellschaft WORT, Abteilung Wissenschaft, Goethestrasse 49, D-8000 München 2, Federal Republic of Germany, for detailed information.

Die in der Zeitschrift veröffentlichten Beiträge sind urheberrechtlich geschützt. Alle Rechte, insbesondere das der Übersetzung in fremde Sprachen, vorbehalten. Kein Teil dieser Zeitschrift darf ohne schriftliche Genehmigung des Verlages in irgendeiner Form – durch Fotokopie, Mikrofilm oder andere Verfahren – reproduziert oder in eine von Maschinen, insbesondere von Datenverarbeitungsanlagen, verwendbare Sprache übertragen werden.

Auch die Rechte der Wiedergabe durch Vortrag, Funk- und Fersehsendung, im Magnettonverfahren oder ähnlichem Wege bleiben vorbehalten.

Fotokopien für den persönlichen und sonstigen eigenen Gebrauch dürfen nur von einzelnen Beiträgen oder Teilen daraus als Einzelkopien hergestellt werden. Jede im Bereich eines gewerblichen Unternehmens hergestellte oder benützte Kopie dient gewerblichen Zwecken gem. § 54 (2) UrhG und verpflichtet zur Gebührenzahlung an die VG WORT, Abteilung Wissenschaft, Goethestrasse 49, D-8000 München 2, von der die einzelnen Zahlungsmodalitäten zu erfragen sind.

Autoren dieser Zeitschrift können unter gewissen Voraussetzungen in die Individualausschüttung von Mitteln aus der Bibliothektantieme und dem Fotokopieraufkommen mit einbezogen werden. Genaue Informationen erteilt die Verwertungsgesellschaft WORT, Abteilung Wissenschaft, Goethestrasse 49, D-8000 München 2.

Die Wiedergabe von Gebrauchsnamen, Handelsnamen, Warenbezeichnungen usw. in dieser Zeitschrift berechtigt auch ohne besondere Kennzeichnung nicht zu der Annahme, daß solche Namen im Sinne der Warenzeichen- und Markenschutz-Gesetzgebung als frei zu betrachten wären und daher von jedermann benutzt werden dürften.

Indexed in Current Contents

Subject Index

A

Acetylcholine 223–230
– -induced potassium current fluctuations 255–262
– recptors 255–262
ACH-induced K-channel 263–269
Acidification defect 137–142
Action potential in the olfactory nerve 209–216
Activation 71–74
– curve 271–279
Activity-dependent changes in conduction velocity 209–216
Acute renal failure 159–164
Adrenalectomized HSI dog 143–150
Alveolar PCO_2 1–9
Amphotericin B 137–142
Angiotensin II 83–85
Angiotensin analogues 83–85
Anions, foreign 63–69
– permeation 231–239
Arterial pCO_2 241–248
– smooth muscle 63–69
Atrial pressure 143–150
Atropine 75–77, 293–295
Automation 11–14
Autonomic nervous system 75–77
Autonomous rhythm 119–126
Autoregulation of RBF 165–169

B

Bereitschaftspotential 39–46
Bevelling extremly fine microelectrodes and micropipettes 287–288
Bicycle ergometer 119–126
Bilateral ureteral ligation 165–169
Blood flow 25–33, 151–157
– pCO_2 137–142
– pressure 19–24
Breathing, control of 1–9

C

Ca^{2+}/Sr^{2+} activation 53–62
Ca^{2+} control of muscle contraction 53–62
$^{45}Ca^{2+}$ uptake by dispersed pancreatic islet cells 281–285
Calcium 171–177, 185–194
– , internal stores 63–69
– probe, chlorotetracycline 281–285
– transport 217–222
Calorigenic actions of noradrenaline and glucagon 113–117
Capillary filtration coefficient 25–33
Cardiac denervation 293–295
– muscle 53–62
– vagal blockade 293–295
Carbon dioxide, sensitivity 249–254
Carotid chemoreflexes 1–9
– loop 143–150
– sinus nerves 249–254
Caudal spinal cord 201–207
Cell swelling 159–164
– volume regulation 159–164
Central chemical drive 1–9
– chemosensitivity 241–248, 249–254
Cerebellar vermis 87–98
Cerebral potentials 39–46
Chemoreceptors 241–248
Chemoreceptor afferents 249–254
Chloride 171–177, 209–216
Cholinergic excitatory tone 75–77
Cold acclimation 113–117
– block, vagal 1–9
Colon 75–77
Compensation mechanism 119–126
Computer analysis 15–18
Computerised image analysis 11–14
Conductance changes by external K 263–269
Conduction microcalorimeter 113–117
– velocity 209–216
Contractile proteins 53–62
Contractility 171–177
Contraction of arterial smooth muscle 63–69
– – respiration 249–254
Control of breathing 1–9

D

Decerebrate cats 179–183
Development of hypertension 19–24
Dispersed cells 281–285
Distensibility of guinea-pig colon 75–77
Dorsal root potentials 201–207
Dystrophy 53–62

E

Electrical activity 15–18
– rhythm (BER) 15–18
Electrode bevelling 287–288
Electrogenic calcium influx 171–177
– Na-K pump, intestine 185–194
Electrolyte excretion 223–230
Electromagnetic flow probe 143–150
Electromyogram 47–52
Electrophysiology 231–239
Elementary conductance 263–269
Enhancing fever 35–38
Enteric nerves 75–77
Extracellular K concentration 271–279
– sodium 217–222
– volume expansion 99–105
Excitation-contraction coupling 63–69

F

Feedback influence on glomerular filtration rate 99–105
Fever and survival 35–38
Filtration coefficient 25–33
Fluid absorption by the loop of Henle 99–105
Force-velocity relation 71–74
FORTRAN program 15–18
Freerunning circadian rhythms of man 119–126
Freeze-etching 127–136

G

Glomerular capillary pressure 99–105
– filtration rate 99–105, 165–169
Glucagon 113–117
Gluconate 171–177
Goal-directed hand movements 39–46
Guanethidine 75–77

H

Handedness 39–46
Heart acclimation 113–117
Heart muscle 271–279
– –, electrical and mechanical properties 171–177
– – voltage clamp 287–288
– rate 19–24
Hepatic artery 151–157
Hodgkin-Huxley equations 209–216
– – process 271–279
Human circadian rhythms 119–126
– scalp 39–46
Hyoscine 75–77
Hypercapnia 241–248
Hyperoxia 151–157
Hypothalamic cooling 35–38
Hypoxia 1–9, 151–157, 241–248

I

Ile^5 angiotensin II 83–85
Ileum 25–33
Inactin 165–169
Inhibitory nerves 75–77
Internal desynchronization 119–126
– stores of calcium 63–69
Intestinal motility 75–77
– spike bursts recognition 15–18
– transport of phosphate 217–222
Intracellular calcium in urinary acidification 107–111
Image analysis 11–14
Immobilisation at different muscle lengths 195–200
Ionic channels 255–262
Ionophore A 23187 107–111
Ischemia 159–164
Isethionate 171–177
Islets of Langerhans 281–285
Isolated epididymal fat cells 113–117
Isometric tetanus 71–74

K

Kidney, acidification 107–111, 137–142
– , blood flow 165–169
– , Na^+-K^+-ATPase 127–136
– necturus 231–239
– , postprandial natriuresis 143–150
– , tubuloglomerular feedback 99–105
K-stimulated ^{45}Ca efflux 63–69

L

Lateralization 39–46
Lateral vestibular nucleus (LVN) 87–98, 179–183
L-Dopa 47–52
Left-handed subjects 39–46
Limb immobilisation 195–200
Linear positioning task 39–46
Lithium 209–216
Liver blood flow 151–157
Loop of Henle 99–105
Lorentzian curves 255–262

M

Macular vestibular input 87–98
– – receptors 179–183
Mandibular and sublingual salivary glands 223–230
Medulla oblongata 241–248
Membrane-bound Na^+-K^+-ATPase protein 127–136
– permeabilities 231–239
– potential 63–69
Microcirculation 25–33
Microelectrodes 287–288
Microperfusion 99–105
Micropipettes 255–262
Micropuncture 83–85, 99–105
– data 11–14
Migrating myoelectric complex analysis 15–18
Mineralocorticoid activity 143–150
Motor cortex 39–46
Muscarinic acetylcholine receptor 255–262
Muscle activity 47–52
– fibre 71–74
– – composition 195–200
– – types 195–200

N

Na excretion, renal, postprandial 143–150
Na^+-K^+-ATPase protein 127–136
Neck and macular vestibular receptors 87–98
– input 87–98
Nerve conduction 209–216
Neurolept-anesthesia 293–295
Nitrate 63–69
Noise analysis 255–262
Non-permeant solute 159–164
Noradrenaline 25–33, 113–117
Noradrenergic neurones 47–52

O

Olfactory nerve 209–216
On channel behavior 271–279
Organic anion permeation 231–239
Oscillating electrogenic Na-K pump 185–194
Ouabain 209–216
– on sodium transport across the rat placenta 79–81
Oxygen consumption 151–157

P

Pancreatic β-cells 281–285
– islets 289–291
pCO_2 137–142
– , arterial 241–248
– surface electrode 289–291
Peritubular membrane 231–239
Phentolamine 75–77
Pheripheral chemoreceptors 241–248
Phosphate transport 217–222
– – in chick jejunum 217–222
Physalaemin 223–230
Physical training 19–24
– workload 119–126
Placental transport 79–81
Polyethylene-glycol 159–164
Polyfructosan clearance 165–169
Portal vein 151–157
Postprandial volume regulation 143–150
Potassium channel 263–269
– current 271–279
Pre-glomerular resistance vessels 99–105
Presynaptic inhibition 201–207
Protection of renal function 159–164
Proximal tubule 231–239
– tubular sodium reabsorption 83–85
Purkinje cells 87–98

Q

Q_{10} 255–262
Quinidine 75–77

R

Raising phase of tetanus 71–74
Receptors, neck and macular vestibular 87–98
Regulation of respiration 241–248, 249–254
Renal acidification 107–111, 137–142
– anion permeation 231–239
– ATPase 127–136
– blood flow 143–150, 165–169
– function 159–164
– tubular acidosis 137–142
Respiratory centers 249–254
– cycle duration 1–9
– pattern 1–9
Right-handed subjects 39–46

S

Sacral spinal cord 201–207
Salivary glands 223–230
Sensitivity to CO_2 249–254
Single channel conductance 255–262
– nephron filtration rate (SNGFR) 99–105
Sino-atrial node 255–262, 263–269, 271–279
Sinusoidal stimulation 179–183
Skeletal muscle 53–62, 195–200
Skinned fibers 53–62
Slow response 171–177
– wave activity 185–194

Experimental Brain Research

ISSN 0014-4819 Title No. 221

Editorial Board: J. Altman, West Lafayette; P. Buser, Paris; A. Cowey, Oxford; O. Creutzfeldt, Göttingen; L. J. Garey, Lausanne; R. Jung, Freiburg i. Br.; D. M. MacKay, Keele; D. Ottoson, Stockholm; H. Thoenen, München; V. P. Whittacker, Göttingen; V. J. Wilson, New York

Research on the central nervous system has developed during the last 20 years into a broad interdisciplinary field. This journal covers the whole field of experimental brain research and thus reflects the variety of interests as represented by the International Brain Research Organization (IBRO): Neurobiology of the brain.

Fields of Interest: Neurophysiology, Sensory Physiology, Neuroanatomy, Neuropharmacology, Neuropathology, Neurochemistry, Neuroendocrinology, Cellular Biology, Developmental Neurobiology, Neurophysiology and the Behavioral Sciences.

KNAUER

Elektronisches Halbmikro-Osmometer

Typ M

zur direkten Bestimmung der Osmolalität aller Körperflüssigkeiten wie Blut, Serum, Urin, Liquor durch Gefrierpunktmessung

Kontrolle der Nierenfunktion
Kontrolle von iso-, hyper- und hypotonischen Lösungen
Prüfung von Infusionslösungen

- Probevolumen nur 0,15 ml oder 0,05 ml
- Betriebsbereitschaft sofort nach dem Einschalten
- Dauer einer Messung ca. 2 Minuten
- Meßgenauigkeit 1–2 Milliosmol/kg bzw. 1%
- Preis DM 3600,— + MWSt
- Lieferzeit 1–2 Wochen

Weitere Spezialität: Komplettes System zur Bestimmung von Molekulargewichten zwischen 50 u. 1 000 000 durch Kryoskopie, Dampfdruck-Osmometrie u. Membran-Osmometrie

Geräte zur Gel- und Flüssigkeits-Chromatographie

Neural Principles in Vision

Editors: F. Zettler, R. Weiler

293 figures. X, 430 pages. 1976
Cloth DM 96,–; US $ 42.30
Proceedings in Life Sciences
ISBN 3-540-07839-8

This volume is the result of a symposium held at the University of Munich in 1975. It summarizes the most recent results of physiological analysis and the anatomical investigations upon which they are based, and thus reflects the current state of visual neurophysiology. The contributions are intentionally limited to the peripheral part of the visual system, thus providing an opportunity to explore the common principles underlying recent discoveries concerning the retinas of vertebrates, arthropods and molluses. It is of special value to all working in the fields of neurobiology, neuroanatomy, sensory physiology and ophthalmology.

Animal Physiologic Surgery

by C. M. Lang

With contributions by E.J. Andrews, H.C. Hughes, C.M. Lang, C.A. Mancuso, W.J. White

54 figures, 5 tables. XI, 180 pages. 1976
DM 26,40; US $ 11.70
ISBN 3-540-90187-6

An introductory surgery text for the beginning professional student. The educational focus is aimed at using surgical techniques to integrate with the other basic science disciplines, especially physiology. All of the procedures are survival, thus permitting the student to assume patient care responsibility while assessing the physiological changes resulting from surgical intervention. The book also brings together the related principles of wound-healing, fluid and electrolyte balance, clinical laboratory procedures, and postmortem examination. Its format and arrangement permit adaptability to individual curricular plans. The book is unique in that its is solely concerned with the educational goals of a beginning surgery course. Although the text is detailed, and at times elementary, it rapidly develops the student into a position requiring considerable skill with a concomitant development of self-confidence.

Contents: Introduction to Surgery: Operating-Room Procedures. Instruments and Sutures. Wound-healing. Anesthesia. Water and Electrolyte Metabolism.—Laboratory Techniques: Laparotomy. Splenectomy. Lobectomy. Ligation of a Coronary Artery. Nephrectomy. Adrenalectomy. Parathyroidectomy and Thyroidectomy. Laminectomy. Ablation of the Motor Cortex. Surgical Procedures: Clinical Laboratory Methods in Physiological Surgery. Basic Electrocardiography. Use of the Sphygmomanometer in the Dog. Necropsy of the Dog.
